

CARE AND OPERATING TIPS

For Your Saleen / Parnelli Jones Limited Edition Mustang

Mat-Black Paint Care

Please note that the mat-black paint on the front hood, trunk lid, wing, rockers, front/rear fascias, and chin spoiler is a unique paint finish that requires special care.

For cleaning:

- use cool or lukewarm water and an automotive shampoo (such as Eagle One Car Wash, or equivalent)
- use a clean, soft sponge or car wash mitt with plenty of water for best results
- never use strong household detergents or soap, such as dishwashing or laundry soap, as this can discolor and spot the surface

For polishing:

- polishing is not recommended as this can cause the low-gloss clear (that covers the mat-black paint) to become shiny

Rear Louver Removal

To remove the rear louver, remove the screws on the sides and top and then carefully lift up around the outer edges to release the Velcro fastener.

Front Hood Pins

When the hood retainer pins are removed to open the front hood, tuck the pins through the front grill to keep them from dangling and possibly damaging the paint on the front bumper.
